

Projects Worth Talking About!

"I have teenagers, and they are pretty hard on the furniture in the family room. I used Edgemate edgebanding to repair our entertainment center, and it looks like new and it didn't take me long."

John T., St. Louis, MO

"Edgemate products are perfect for my refinishing projects! My partner and I have a small antique shop, and I enjoy doing some of the furniture repairs and restoration work myself. The Edgemate edgebanding is especially easy to use to get just the right look!"

Gerri S., San Antonio, TX

"When we bought our home, we knew we had lots of fix-up projects, but none more daunting than remodeling the kitchen. We used Edgemate veneer to completely redo our kitchen cabinets. It was pretty easy and very cost effective."

Robert & Loren B., Sacramento, CA

As America's largest producer of veneer edging products, Edgemate® offers the most popular sizes, in the highest quality finishes for your project.
